

WE'VE GOT OUR HANDS ON EVERY ASPECT OF WORKPLACE SAFETY

1 We're dedicated to workplace health and safety for every New Brunswicker.

While New Brunswick is one of the safest provinces to work in Canada, we want to help support employers in the province to do even better. Keeping workers healthy and safe is good for us all.

2 We're enhancing occupational health and safety support for workplaces.

We're investing more—to help more. More health and safety officers and tools mean employers get the support they need to prevent incidents and injuries.

3 We're investing more to create a strong workplace safety culture in New Brunswick.

We're getting even more hands-on by adding more health and safety officers as well as implementing new inspection processes throughout the province. Our collaborative approach includes more communication about safety officer visits to help employers become leaders in creating a strong workplace safety culture in New Brunswick.

4 We're supporting workplaces to meet health and safety guidelines and inspection criteria.

Our website, worksafenb.ca, has tools and resources to help you get ready for a visit from your WorkSafeNB officer, prepare for the new inspection process, and learn more about health and safety. We've also included checklists and FAQs to help.
