

WorkSafeNB is **MODERNIZING!**

In our commitment to trust, accountability and client-focused service, WorkSafeNB is updating our finance system to an Oracle cloud-based solution, effective January 31, 2026.

Oracle is a trusted platform used by businesses all over the globe. Mobile-friendly, it offers self-serve options such as payment status tracking, access to historical data, and the ability to update contact and banking information. As an organization that receives payments from WorkSafeNB, there are three things you need to know.

1

We need updated business information.

To enable a seamless and positive experience, we must verify information, such as contacts, addresses and business numbers before system implementation.

ACTION: Watch for an email from us requesting information and respond to it as soon as possible or call (506) 633-3557.

2

No payments will be processed between December 8, 2025 and February 9, 2026.

For a successful transition from one system to another, invoice and purchase order activities will be on hold during the cutover period.

ACTION: Submit all invoices by Friday, December 5th to prevent unnecessary payment delay.

3

Electronic Fund Transfer (EFT) will be the preferred method for payments.

EFTs are one of the most reliable ways to pay, ensuring faster, more secure and efficient payments.

ACTION: Call us now to set up EFT (if not already registered): (506) 633-3557.

THANK YOU for your ongoing collaboration as we improve our services.
